

MAHASHANKH DESIGN INTELLIGENCE CLOUD (MDIC)

Vision

Build the world's first AI-native Design Operating System that unifies graphic design, image editing, vector design, CAD, 3D visualization, printing, branding, manufacturing, collaboration, and enterprise workflow automation into one cloud platform.

The goal is not to copy existing software, but to eliminate the need to move between multiple applications for common professional workflows.

Universal Design Workspace

One workspace should support:

- Raster Image Editing
 - Vector Design
 - Surface Pattern Design
 - Textile Design
 - Wallpaper Design
 - Saree Design
 - Garment Design
 - Fashion Design
 - Interior Design
 - Furniture Design
 - Packaging Design
 - Product Design
 - Logo Design
 - Brand Design
 - CAD Preparation
 - 3D Design
 - Motion Graphics
 - Video Editing
 - Presentation Design
 - Web Graphics
 - Social Media Design
 - Print Production
-

AI Creative Workspace

Every project includes AI assistants that can:

- Generate ideas
 - Generate layouts
 - Improve designs
 - Rewrite text
 - Suggest typography
 - Create brand systems
 - Create icons
 - Create illustrations
 - Create product mockups
 - Build presentations
 - Generate advertisements
 - Optimize for print
 - Generate manufacturing files
 - Predict commercial appeal
-

Professional Design Tools

Raster Editing

- Unlimited Layers
 - Layer Groups
 - Layer Styles
 - Smart Objects
 - Blend Modes
 - Layer Masks
 - Clipping Masks
 - Non-destructive Editing
 - AI Object Selection
 - AI Background Removal
 - AI Object Replacement
 - AI Generative Fill
 - AI Inpainting
 - AI Outpainting
 - AI Super Resolution
 - AI Color Correction
 - AI Noise Reduction
 - RAW Image Support
 - HDR Support
 - Batch Processing
-

Vector Design

- Pen Tool
 - Pencil Tool
 - Shape Builder
 - Boolean Operations
 - Smart Guides
 - Variable Stroke Width
 - Gradient Mesh
 - Symbols
 - Pattern Brushes
 - Typography on Path
 - Vector Tracing
 - SVG Editing
 - EPS Support
 - PDF Support
 - AI Vector Generation
-

Typography Engine

- OpenType Features
 - Variable Fonts
 - Font Manager
 - Text Styles
 - Paragraph Styles
 - AI Font Pairing
 - AI Font Suggestions
 - Multilingual Support
 - Curved Text
 - Text Effects
 - Auto Translation
 - OCR
-

Layout & Publishing

- Multi-page Documents
- Master Pages
- Grid Systems
- Tables
- Data Merge
- Catalog Builder
- Magazine Layout
- Book Design
- Packaging Layout

- Print Bleed
 - Crop Marks
 - Color Management
 - PDF/X Export
-

Surface Pattern Studio

- Seamless Pattern Generator
 - Repeat Checker
 - Half Drop
 - Brick Repeat
 - Mirror Repeat
 - Random Repeat
 - Pattern Scaling
 - Colorway Generator
 - Fabric Simulation
 - Wallpaper Roll Preview
 - Tile Preview
 - Room Preview
-

Fashion & Textile Studio

- Saree Designer
 - Kurti Designer
 - Garment Designer
 - Fabric Mapping
 - Print Placement
 - Embroidery Planning
 - Textile Repeat
 - Fabric Drape Simulation
 - Trim Library
 - Pattern Library
 - Fashion Collection Builder
-

Interior & Architecture Studio

- Room Planner
- Space Planning
- Furniture Layout
- Material Library
- Lighting Simulation
- Paint Visualizer
- Wallpaper Visualizer

- Flooring Visualizer
 - Ceiling Designer
 - Kitchen Designer
 - Bathroom Designer
 - 3D Walkthrough
 - Virtual Reality Preview
-

Product Design Studio

- Product Rendering
 - Packaging Design
 - Label Design
 - Bottle Designer
 - Box Designer
 - 3D Product Mockups
 - Material Simulation
 - Manufacturing Drawings
 - Exploded Views
-

AI Design Agents

Specialized agents collaborate automatically:

- Creative Director Agent
 - Graphic Designer Agent
 - Brand Designer Agent
 - Fashion Designer Agent
 - Textile Designer Agent
 - Surface Pattern Agent
 - Wallpaper Designer Agent
 - Interior Designer Agent
 - Packaging Designer Agent
 - Product Designer Agent
 - Print Production Agent
 - Marketing Agent
 - Quality Assurance Agent
 - ERP Integration Agent
-

Enterprise Workflow

Each project supports:

- Team Collaboration
 - Comments
 - Live Editing
 - Version History
 - Approval Workflow
 - Task Assignment
 - Digital Asset Management
 - Role-Based Permissions
 - Audit Logs
 - API Automation
 - Webhooks
 - Enterprise Search
-

Manufacturing & Print

- CMYK Workflow
 - Pantone Matching
 - ICC Profiles
 - Spot Colors
 - TIFF Export
 - BMP Export
 - PNG Export
 - JPEG Export
 - SVG Export
 - PDF/X Export
 - EPS Export
 - AI-Compatible Export
 - Print Imposition
 - Color Separation
 - RIP Validation
 - Large Format Printing
 - Textile Printing
 - Wallpaper Printing
 - Packaging Printing
 - Embroidery Export
 - CNC Export
 - Laser Cutting Support
-

AI Automation

Users should be able to type:

"Create a luxury wallpaper collection for Dubai hotels, generate 200 seamless designs, prepare CMYK production files, create a printed catalog, generate marketing visuals, assign SKUs, create ERP records, and prepare all assets for factory production."

The platform automatically coordinates AI agents to complete the entire workflow.

Enterprise API Platform

Every capability is available through secure APIs:

- Image API
 - Vector API
 - Typography API
 - Design API
 - Pattern API
 - Fashion API
 - Interior API
 - Packaging API
 - Product API
 - Brand API
 - Print API
 - Manufacturing API
 - AI Agent API
 - Workflow API
 - Collaboration API
 - Asset Management API
 - Search API
 - ERP API
 - Analytics API
-

Long-Term Mission

Mahashankh Design Intelligence Cloud should become the AI infrastructure layer for creative and manufacturing industries, enabling enterprises to design, collaborate, manufacture, market, and manage digital assets from one unified platform. Its advantage should come from AI-driven workflow automation, enterprise integration, and industry-specific intelligence rather than simply replicating existing desktop software.
